

Alpenföhn Zugspitze

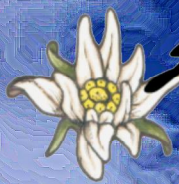

Alpenföhn „Zugspitze“ - for all users who want to fly at higher game!

With this new Multisocket-Cooler from the „Alpenföhn-Line“ the manufacturer is aiming at all users seeking for highest performance and low noise. It doesn't matter if you're the proud owner of an Intel- or AMD-System, with the “Zugspitze“ you're on the right side.

Through the full.copper base the heat will be transmitted very fast to the five L-shaped heatpipes, and from them direct to the aluminium-fins. This cooling concept-absorbing rubber-buckles to the heatsink. This combination assures an amazing air-flow of 74CFM an a nearly inaudible noise of 23 dB(A) max.

Cooler specification:

article number:	84000000012
total high:	145 mm
paste:	2 gr. silver thermal compound
mounting:	universal mounting for Intel 775 and AMD.

Alpenföhn Zugspitze

fan specification:

model:	GP/DF 12D3812CM-002
bearing:	sleeve bearing
size:	120x38 mm
cable length:	300 mm
voltage:	12 VDC
speed:	800 - 1800 rpm/min
noise:	14 - 26 dB(A) max.

heatsink specification:

size:	145x143x141,5mm
material:	aluminium fins, copper baseplate and 5 copper pipes.

usable for:	All Intel LGA775, AMD and AM2 processors.
